

Breakthrough Antibody Test for COVID-19

Detects all 3 antibodies (IgA, IgM, IgG) in just 15 minutes via oral swab

CovAbScreen™ is an oral sample COVID-19 rapid antibody test. Unlike other antibody tests that require a blood draw, CovAbScreen is administered with a simple mouth swab, making it easy and painless for patients of all ages. The kit does not require instruments, and the test is completed on-site with results in just 15 minutes.

CovAbScreen stores at room temperature and is manufactured in the U.S.A. Available only through select distributors. **To learn more about becoming a distributor, visit CovAbScreen.com**

RESULTS

1. Swab
2. Swish
3. Start timer
4. See results
