Dear Valued Customer,

All Sandoz Inc. finished products are labeled in compliance with the requirements of the Food and Drug Administration (FDA) and must be used in the prescribed manner. Within each package of finished pharmaceutical products is a Package Insert which will provide all necessary information.

Pharmaceutical products which are solids, e.g., tablets and capsules, and are in final form for direct administration to patients, are exempt from the requirements of the Hazard Communication Standard (29 CFR 1910:1200). An approved package insert should provide ample product information. This exemption does not include finished pharmaceutical products in non-solid or non-final form. Accordingly, Sandoz Inc. will furnish SDSs for products supplied in bulk, ampules, syringes, or vials, and as creams, liquids, lotions, ointments, or transdermal systems.

If you have any questions regarding a specific pharmaceutical product or component, please do not hesitate to call 1-800-525-8747.

Sincerely,

Sandoz Inc.
