

Infection Prevention Systems

Convertors® Products

Convertors® Infection Prevention Products

We are dedicated to providing innovative, high-performance products that enable you to meet your goals of patient care and staff protection.

As a trusted provider of quality products and services, Cardinal Health has been helping clinicians and staff improve the quality of patient care and reduce the occurrence of healthcare-acquired infections.

Preventing healthcare-acquired infections takes a coordinated effort from everyone. It also means keeping up with, and ahead of, the emerging industry standards and regulations. Cardinal Health has been helping clinicians reduce the occurrence of these infections by providing top-quality Convertors® products for more than 30 years.

But, products are only part of the equation. Today, we're taking another step forward in the effort to reduce healthcare-acquired infections with the creation of Infection Prevention Systems – a proactive combination of products and educational services designed to help you stay on the leading edge of infection prevention.

Tiburon® Surgical Drapes

Tiburon surgical drapes were designed to improve patient outcomes by contributing to the reduction of surgical site infections. Tiburon surgical drapes are impervious and puncture resistant providing the highest level of protection.

As Tiburon fabric is impervious, the absorbent top layer can effectively hold and disperse fluid away from the patient, reducing the chance of contamination and infection. Under the AAMI (Association for the Advancement of Medical Instrumentation) Liquid Barrier Performance guidelines, Tiburon is rated an AAMI Level 4 and provides the highest level of protection available in a surgical drape.

Astound® Surgical Gowns

Astound surgical gowns offer lightweight fabric with outstanding barrier protection. They are offered in standard, fabric-reinforced and impervious-reinforced versions to suit your varying needs.

Astound standard and fabric-reinforced surgical gowns are rated the highest when compared to their competition and classified as an AAMI Level 3. Astound impervious-reinforced gowns have a Level 4 rating, the highest rating established by AAMI.

SmartGown™ Surgical Gowns

For the most demanding procedures, this breathable impervious surgical gown sets new standards for cool comfort and impervious protection against both fluid and microorganisms. SmartGown surgical gowns are classified as an AAMI Level 4 rating, the highest rating established by AAMI.

SmartSleeve™ Surgical Gowns

SmartSleeve surgical gowns combine two advanced medical fabric technologies resulting in a gown with an excellent balance between comfort and protection. The gown body is made with Astound fabric which is lightweight and breathable, yet still offers excellent barrier properties. The sleeves are constructed with the SmartGown material. SmartSleeve surgical gowns are classified as an AAMI Level 4 rating, the highest rating established by AAMI.

Optima® Surgical Drapes and Gowns

Our Optima surgical drape and gown fabric is an industry standard fabric that is drapable, fluid repellent and breathable for comfort.

Facial Protection

The Facial Protection team of Cardinal Health is proud to introduce our new Fluid Resistant Product Line that delivers superior protection while delivering the greatest comfort.

Sterility Assurance

Our innovative Sterilization wrap design; Autopak® and the purple-to-green advanced ink chemistry in our sterilization monitoring product portfolio help sterile processing departments improve their quality of outcomes, help prevent errors and reduce costs. Contact your Cardinal Health sales representative and ask for your copy of our CE-accredited independent study guide entitled *Infection Prevention: Sterility Assurance in the Perioperative Setting*.

Protective Apparel

Our goal is to help you maximize patient care at the most economical cost. Using our protective apparel products from Cardinal Health in conjunction with an effective standardization program can add up to important total supply chain savings that can help you stay competitive in today's health-care environment.

OR Setup and Accessories

We offer a wide range of equipment and instrument drapes, light handle solutions, needle counters and other accessories to meet your specific OR requirements.

Emerald® Surgical Drapes

This thicker premium surgical drape fabric provides great strength and fluid protection, yet it's still very soft, low in lint and easy to drape. Emerald drapes are specially designed for lengthy, high-fluid procedures.

Iso•Bac® Reinforcement

This is the industry's only drape reinforcement treated with an antimicrobial agent to help reduce infections. It is also absorbent for fluid control and is impervious to help protect against strike-through. Iso•Bac reinforcement surrounds the fenestration of select orthopedic and cardiovascular drapes.

AAMI PB70:2003

**Liquid Barrier Performance and Classification of Protective Apparel and Drapes Intended for Use in Health Care Facilities*

Tiburon® surgical drapes are classified as a Level 4 device under the AAMI guidelines for barrier performance and provide the highest level of protection available in a surgical drape.

SmartGown™ surgical gowns and Astound® impervious-reinforced gowns are both classified as an AAMI Level 4 under these new guidelines; the highest rating established by AAMI. For a complete copy of AAMI PB70:2003 visit their web site at www.aami.org.

Flammability

All of our surgical drape and gown materials, without exception, meet the Standard for the Flammability of Clothing Textiles CPSC 16 CFR Part 1610. You'd expect nothing less. But preventing fires is more than a matter of choosing a fabric. Contact your Cardinal Health sales representative and ask for your copy of our CE- and CME-accredited independent study guide entitled *Surgical Fire Prevention: A Comprehensive Look*.

Freedom from Latex

Rest assured, our surgical drapes and gowns are all latex-free. Cardinal Health package labels clearly show the latex-free symbol of all latex-free products.

**SmartGown™
Surgical Gowns**

**SmartSleeve™
Surgical Gowns**

**Optima® Surgical
Gowns and Drapes**

Surgical Gowns

Under the AAMI Liquid Barrier Performance Standards, Astound®, SmartGown™ and SmartSleeve™ surgical gowns all achieve the highest rating possible for barrier protection within their respective gown categories.

SmartGown surgical gowns, using microfiber technology, will change the way you think about breathable impervious gowns. They have a responsive membrane that reacts to increasing temperature by increasing its moisture vapor transfer rate. ***SmartGown surgical gowns are classified as a Level 4 under the new AAMI guidelines for barrier performance, the highest classification for a surgical gown.***

Astound surgical gowns offer lightweight fabric with outstanding barrier protection. Astound standard and fabric-reinforced surgical gowns are rated the highest when compared to their competition, and classified as an AAMI Level 3. Astound impervious-reinforced gowns have a Level 4 rating, the highest rating established by AAMI.

We also offer SmartSleeve surgical gowns, which combine elements from both Astound and SmartGown surgical gowns. The body of the gown is made from the same tri-layer fabric as the Astound gowns, while the sleeves incorporate the breathable, impervious protection of the SmartGown fabric. ***SmartSleeve surgical gowns are classified as an AAMI Level 4, the highest rating established by AAMI.***

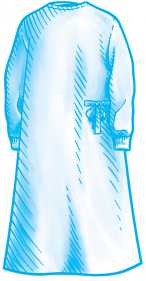

Draping Systems

Tiburon® surgical drapes are engineered to pass the industry standard tests that measure fluid and synthetic viral penetration, which helps to provide the maximum in clinician and patient safety. They are resistant to abrasion and puncture, yet their flexible, cloth-like properties allow them to drape naturally, following the contours of the patient.

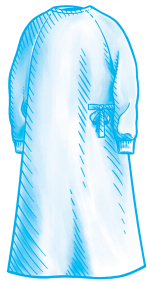

The impervious structure of Tiburon surgical drapes can help reduce the occurrence of strikethrough, which creates a pathway for microorganisms, that can lead to contamination and infection. In addition, the absorbent top layer can effectively hold and disperse fluid away from the patient.

Classified as a Level 4 device under the AAMI guidelines for barrier performance, Tiburon surgical drapes provide the highest level of protection available in a surgical drape. Tiburon fabric also passes the even more stringent industry test for viral penetration, ASTM F1671. Tiburon surgical drapes are designed to improve patient outcomes by contributing to the reduction of surgical site infection.

- Dual 6" circular fenestrations, 3½" apertures

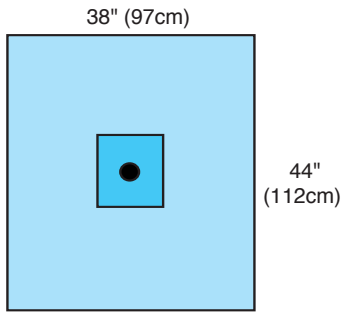

Tiburon® Surgical Drapes

Tiburon surgical drapes were designed to improve patient outcomes by contributing to the reduction of surgical site infections. Tiburon surgical drapes are impervious and puncture resistant providing the highest level of protection.

As Tiburon fabric is impervious, the absorbent top layer can effectively hold and disperse fluid away from the patient, reducing the chance of contamination and infection.

Under the AAMI Barrier Performance Guidelines, Tiburon is rated an AAMI Level 4 and provides the highest level of protection available in a surgical drape.

Tiburon® Surgical Drapes

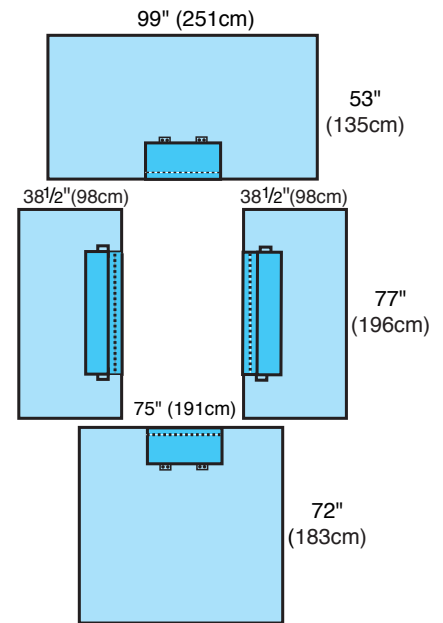

Tiburon surgical drapes were designed to improve patient outcomes by contributing to the reduction of surgical site infections. Tiburon surgical drapes are impervious and puncture resistant providing the highest level of protection.

As Tiburon fabric is impervious, the absorbent top layer can effectively hold and disperse fluid away from the patient, reducing the chance of contamination and infection.

Under the AAMI Barrier Performance Guidelines, Tiburon is rated an AAMI Level 4 and provides the highest level of protection available in a surgical drape.

Astound® Surgical Gowns

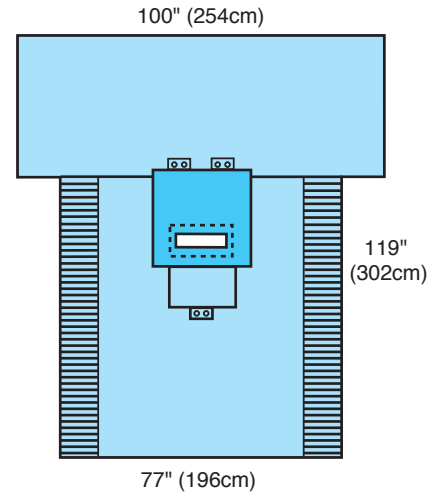

Astound surgical gowns offer lightweight fabric with outstanding barrier protection. They are offered in standard, fabric-reinforced and impervious-reinforced versions to suit your varying needs.

Astound standard and fabric-reinforced surgical gowns are rated the highest when compared to their competition and classified as an AAMI Level 3. Astound impervious-reinforced gowns have a Level 4 rating, the highest rating established by AAMI.

To order these products, please refer to pages 23-26.

Tiburon® Surgical Drapes

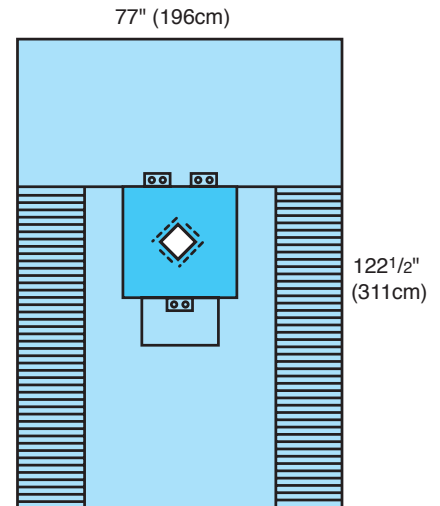

Tiburon surgical drapes were designed to improve patient outcomes by contributing to the reduction of surgical site infections. Tiburon surgical drapes are impervious and puncture resistant providing the highest level of protection.

As Tiburon fabric is impervious, the absorbent top layer can effectively hold and disperse fluid away from the patient, reducing the chance of contamination and infection.

Under the AAMI Barrier Performance Guidelines, Tiburon is rated an AAMI Level 4 and provides the highest level of protection available in a surgical drape.

Astound® Surgical Gowns

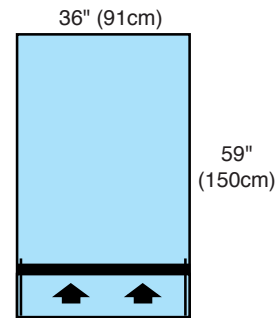

Astound surgical gowns offer lightweight fabric with outstanding barrier protection. They are offered in standard, fabric-reinforced and impervious-reinforced versions to suit your varying needs.

Astound standard and fabric-reinforced surgical gowns are rated the highest when compared to their competition and classified as an AAMI Level 3. Astound impervious-reinforced gowns have a Level 4 rating, the highest rating established by AAMI.

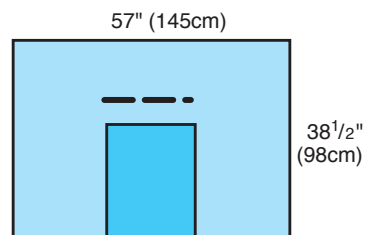

To order these products, please refer to pages 23-26.

SmartSleeve™ Surgical Gowns

SmartSleeve surgical gowns combine two advanced medical fabric technologies resulting in a gown with an excellent balance between comfort and protection. The gown body is made with Astound fabric, which is lightweight and breathable yet still offers excellent barrier properties. The sleeves are constructed with the SmartGown material.

Eyescape™ Refractive Drape

- Short plastic bottom portion leaves patient mouth and nose uncovered for easier breathing
- Minimized adhesive area for maximum patient comfort during removal

Designed specifically for LASIK procedures, this drape can be easily applied by one person. The perforated, two-piece design isolates the upper and lower lids and allows the size of the aperture to be customized.

Tiburon® Surgical Drapes

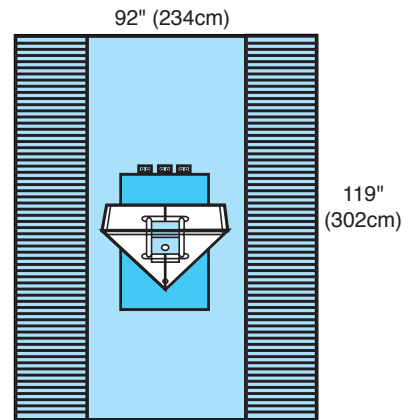

Tiburon surgical drapes were designed to improve patient outcomes by contributing to the reduction of surgical site infections. Tiburon surgical drapes are impervious and puncture resistant providing the highest level of protection.

As Tiburon fabric is impervious, the absorbent top layer can effectively hold and disperse fluid away from the patient, reducing the chance of contamination and infection.

Under the AAMI Barrier Performance Guidelines, Tiburon is rated an AAMI Level 4 and provides the highest level of protection available in a surgical drape.

Tiburon® Surgical Drapes

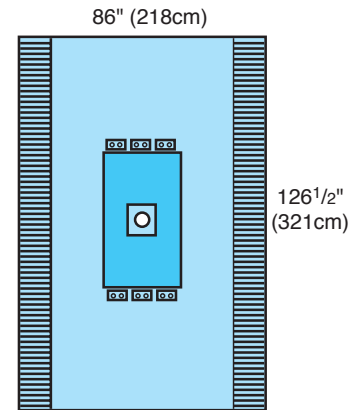

Tiburon surgical drapes were designed to improve patient outcomes by contributing to the reduction of surgical site infections. Tiburon surgical drapes are impervious and puncture resistant providing the highest level of protection.

As Tiburon fabric is impervious, the absorbent top layer can effectively hold and disperse fluid away from the patient, reducing the chance of contamination and infection.

Under the AAMI Barrier Performance Guidelines, Tiburon is rated an AAMI Level 4 and provides the highest level of protection available in a surgical drape.

**Tiburon® Split Sheet Drape 29440**

- Iso-Bac® absorbent reinforcement, 28" x 48"
- Split with adhesive, 46" x 6" wide

Iso-Bac® Reinforcement

Iso-Bac is the industry's only drape reinforcement treated with an antimicrobial agent to help reduce infections. It is also absorbent for fluid control and is impervious to help protect against strike-through. Iso-Bac reinforcement surrounds the fenestration of select drapes.

Astound® Surgical Gowns

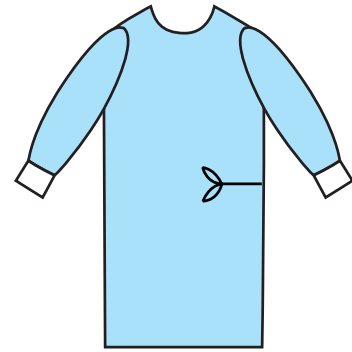

Astound surgical gowns offer lightweight fabric with outstanding barrier protection. They are offered in standard, fabric-reinforced and impervious-reinforced versions to suit your varying needs.

Astound standard and fabric-reinforced surgical gowns are rated the highest when compared to their competition and classified as an AAMI Level 3. Astound impervious-reinforced gowns have a Level 4 rating, the highest rating established by AAMI.

To order these products, please refer to pages 23-26.

Isolation and Cover Gowns

These protective garments are available in single-layer spunbonded polypropylene for basic coverage or a trilayer spunbond meltblown spunbond (SMS) fabric for increased fluid resistance. Each gown features a waist belt and elastic cuffs. Choose from either ties or a tape tab at the neck. All gowns are packaged in cases with ten poly-bags each containing ten gowns.

Comfort and Coverage

Our durable footwear is constructed of materials ranging from basic spunbonded polypropylene to polyethylene-coated SMS to accommodate a wide range of intended uses. Available in a variety of styles and sizes to meet your needs.

Ankle-Top Shoe Covers

Designed to completely cover shoes and extend well above the ankle, our ankle-top shoe covers are made of durable, fluid-resistant SMS fabric. An elastic band at ankle and top provides secure, self-adjusting fit. 100% latex free.

Dura-Trac™ Shoe Covers

Our Dura-Trac™ shoe covers are constructed of poly-film, which helps minimize lint and enhance environment cleanliness. Excellent antiskid protection makes these shoe covers ideal for the challenges of both dry and wet conditions. Their one-piece butterfly design helps minimize fluid strike-through with the elimination of the bottom seam. Provide exceptional fluid resistance and durability. Distinctive thread colors identify sizes. 100% latex-free.

Headwear and Footwear

Critical Zone™ high-top shoe covers

Impervious Shoe Covers

For use in fluid-intensive conditions, our shoe covers are impervious to blood and blood-borne pathogens, and are made of durable polypropylene fabric. Ultrasonically bonded seams seal out fluid. Patented separate elastic band at the ankle minimizes the chance of fluid strike-through by eliminating pinholes caused by stitched-in elastic. Bound elastic seams at the foot reinforce fluid protection and adjust for a customized fit. Foam strips provide anti-skid protection and assist in donning orientation.

Total Supply Chain Savings

Our goal is to help you maximize patient care at the most economical cost. Using these Best Value™ products in conjunction with an effective standardization program can add up to important total supply chain savings and can help you stay competitive in today's health-care environment.

Facial Protection

The first step in infection prevention

Cardinal Health is committed to delivering the highest quality facial protection products to your health-care organization. We provide solutions that consist of the best tools, resources and innovations in the industry to outfit health-care workers, and patients where applicable.

We firmly believe that comfort drives compliance. Being comfortable is what motivates an individual to wear a facial protection product properly and to consistently follow good technique. Good technique ensures compliance, which helps lower the risk of infection within your health-care facility. Cardinal Health strives to ensure that your facility is protected by delivering products engineered with comfort in mind. Our products meet or exceed industry standards for fluid resistance, bacterial and particulate filtration, and breathability.

Secure-Gard® Multi-Color Fluid-Resistant/Laser Facial Protection Products

- Distinctive multi-color outer-facing
- Sonically welded anti-fog foam strip
- Anti-glare strip on masks with optically clear, wraparound eyeshields

Secure-Gard® fluid-resistant products are designed to complement the exceptional needs of the health-care worker. All Secure-Gard fluid-resistant products are uniquely constructed with light and cool proprietary materials that achieve superior fluid-resistance and laser plume protection, while providing a cool, comfortable fit.

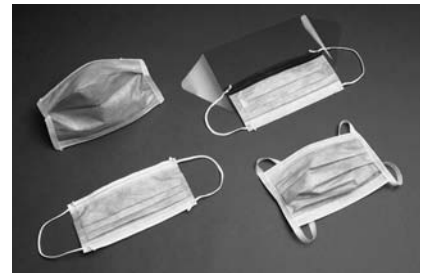

To help ensure full protection for a health-care facility, all Secure-Gard fluid resistant products are easy to identify by their distinctive multi-color outer-facing. This helps eliminate the risk of choosing a non-fluid-resistant mask for a procedure with potential exposure to harmful fluids. Secure-Gard fluid-resistant products pass ASTM Standards for synthetic blood penetration (ASTM F1862) at 160 mm/Hg and are ideal for use during laser procedures by filtering .1 micron of particulate at 99% efficiency.

Is your facility practicing Respiratory Etiquette?

In accordance with Respiratory Etiquette Recommendations* as issued by the Centers for Disease Control and Prevention (CDC), Cardinal Health is encouraging its healthcare customers to implement a universal respiratory etiquette plan for their healthcare facility. The CDC has identified the use of various infection prevention related products in support of these recommendations.

Total Supply Chain Savings

Our goal is to help you maximize patient care at the most economical cost. Using these facial protection products from Cardinal Health in conjunction with an effective standardization program can add up to important total supply chain savings that can help you stay competitive in today's health-care environment.

Procedure Masks

Due to the broad range of uses of earloop face masks within the health-care environment, Secure-Gard® procedure masks are available in various constructions based on the level of protection necessary.

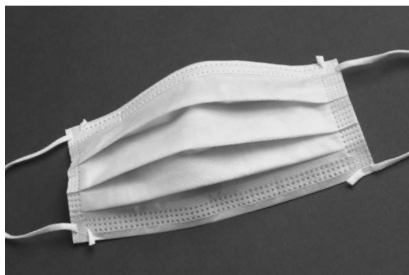

Polypropylene Outer Facing/Polypropylene Inner Facing

AT7511

This is our most popular type of earloop face mask due to the flexibility this design provides. It is ideal for patient use and quick application, as it delivers the same level of protection to the wearer if worn correctly or inside-out. These masks are also ideal when practicing respiratory etiquette as recommended by the Centers for Disease Control and Prevention (CDC). Polypropylene is a polymer-based material that is more likely to repel small amounts of fluid such as respiratory droplets.

Cat. No	Description	Color	Qty. Bx	Qty. Cs
AT7511	Procedure mask	Blue	50	300
AT7004	Procedure mask	Yellow	50	300
AT7511-WE	Procedure mask with eyeshield	Blue	25	100

AT71021

Polypropylene Outer Facing/Tissue Inner Facing

These masks are generally used in the health-care setting for general, non-surgical procedures and check-ups. The polypropylene outer-facing is more likely to repel small amounts of fluids such as respiratory droplets.

Cat. No	Description	Color	Qty. Bx	Qty. Cs
AT70021	Procedure mask	Yellow	50	300

Secure-Gard® Visor Systems

Secure-Gard® visor systems are designed to offer some of the highest levels of protection during surgical or high-risk general procedures, which may involve splashing or spraying of potentially infectious fluids. Meeting OSHA Bloodborne Pathogen Regulations, these products are interchangeable and are designed to be used with surgical or procedure face masks where appropriate.

Frames are lightweight and provide visor protection that extends over the shield. This cost-effective option is re-usable with new shields.

Shields are treated with an anti-fog coating on both sides. These shields offer side shield protection and are optically clear. They fit comfortably over glasses and should be disposed of after each use.

Simul-Wrap® sterilization wrap

Simul-Wrap sterilization wrap is designed with the increasingly complex requirements of sterile processing, OR aseptic technique and infection control in mind. While the performance aspects of wrapping products are essential – Simul-Wrap sterilization wrap meets or exceeds the standards and recommended practices set forth by AAMI and AORN – it is the design features that allow the products to be functional, effective and of unique value.

Secure-Wrap® sterilization wrap

Our Secure-Wrap sterilization wrap is made of a three-layer SMS polypropylene. Long-fiber spunbond outer layers encase a meltblown-fiber layer for tear-resistant strength on the outside and bacteria-resistant construction within.

Bio-Shield® wrap

Our versatile, nonwoven Bio-Shield wrap offers fluid repellency and provides an excellent barrier against airborne bacteria. This soft, drapable nonwoven blend of cellulose and polyester is virtually lint-free and helps protect wrapped contents from contamination. Bio-Shield wrap is available in three different weight options.

AutoPak® sterilization packaging

AutoPak is an innovative new product that provides visual access to package contents, time and motion economies in preparation and presentation, and the means to reduce the total cost of instrument processing.

Sterilization pouches, tubing and bags

Cardinal Health understands the challenges of sterile processing in today's environment. Our line of sterilization pouches, tubing and bags incorporates both advanced surgical-grade paper and low-temperature peel pouches and tubing with a comprehensive offering of sterile storage bags and covers. Whether your sterilization needs call for steam, ethylene oxide (EO) or plasma compatibility, Cardinal Health can provide the solution that meets your needs.

Sterilization monitoring

The purple-to-green advanced chemical technology employed in many of Cardinal Health's sterilization monitoring products confirms the appropriate conditions for sterilization were achieved and helps maintain better process control.

Simul-Wrap® Sterilization Wrap

- Simple and consistent design pattern
- Color-coded by basis weight

Today's fast-paced health-care environment can be tough enough on sterilization wrap, but the design pattern of a wrap can make a significant difference in the ability to identify rips and tears that may occur. That is why Cardinal Health has developed a sterilization wrap with a simple and consistent design pattern that allows for quick and easy identification of compromised wrappers, if and when they exist. In addition, Cardinal Health's Simul-Wrap® sterilization wrap is color-coded by basis-weight, helping to ensure that the correct wrapper is selected for each instrument set being packaged. Combined, these two features will help your facility to reduce errors and improve quality of outcomes.

Performance by Design

The purple-to-green integrating ink technology is the basis for many of Cardinal Health's sterilization monitoring products. This consistent, reliable technology allows labor- and cost-constrained sterile processing departments to improve their quality of outcomes by providing more information about the steam sterilization cycle. ***To order this product, please refer to page 220.***

Secure-Wrap® Sterilization Wrap

- Simple and consistent design pattern
- Color-coded by basis weight

Made from a durable trilaminate, nonwoven polypropylene material, our single-layered Secure-Wrap® sterilization wrap provides excellent fluid repellency and superior barrier protection. Secure-Wrap® sterilization wrap also features a simple and consistent design pattern, allowing for quick and easy identification of compromised instrument sets.

Performance by Design

Look to Cardinal Health for a complete line of unique sterilization packaging products, from alternative packaging called AutoPak®, Simul-Wrap® sterilization wrap to sterilization pouches, tubing and bags.

SupraShield Express® Sterilization Wrap

- 1 sheet with all the performance of 2

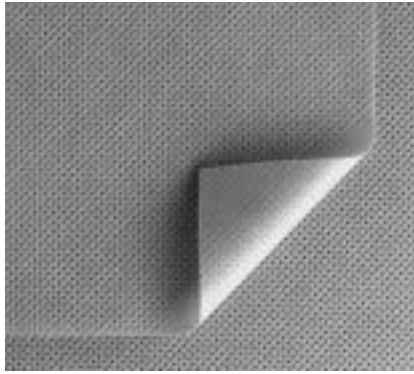

Our single-sheet, double-thickness wrap is easy to use, saving time and effort because there's no need to wrap twice. An advanced layering process produces one double-thick sheet with all the strength and performance of two. Designed for nonsequential wrapping, the single sheet of polypropylene material offers enhanced abrasion resistance and exceptional drapability.

Sterilization Packaging *Wrap*

SupraShield® sterilization wrap

SupraShield® Sterilization Wrap

- Tear- and puncture-resistant
- Available in 5 grades

For protection against fluid and airborne contamination, these single sheet sterilization wrap is made from a 100% polypropylene barrier fabric. The wraps are tear- and puncture-resistant, yet are extremely soft and conform to even difficult-to-wrap items. They also feature excellent breathability; steam and gas readily penetrate and evacuate packs.

Performance by Design

Simul-Wrap® sterilization wrap is designed with the increasingly complex requirements of Sterile Processing, OR aseptic technique and infection control in mind. Simul-Wrap meets or exceeds the standards and recommended practices set forth by AAMI and AORN. *To order this product, please refer to page 201.*

Sterilization Packaging *Wrap*

Bio-Shield® wrap

Bio-Shield® Wrap

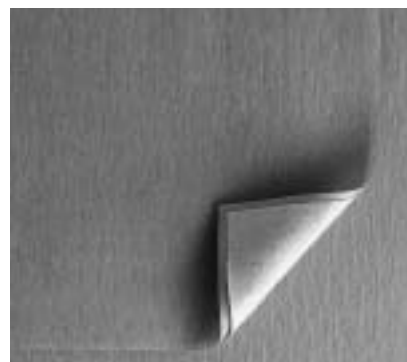

Our versatile, nonwoven Bio-Shield® wrap offers fluid repellency and provide an excellent barrier against airborne bacteria. Soft, drapable nonwoven blend of cellulose and polyester is virtually lint free and helps protect wrapped contents from contamination.

AutoPak® Sterilization Packaging

- Provides visual access to package contents
- Offers time and motion economies in preparation and presentation
- Enables reduction in total cost of instrument processing

Seeing is believing with the AutoPak® sterilization packaging system as visual access eliminates the troublesome unknown. AutoPak® pouches are designed and manufactured to comply with the standards and guidelines published by AORN and AAMI for clinical packaging systems, and they satisfy the guidelines for the use of an Event Related Sterility Program.

The Clear Solution for Sterilization Packaging

AutoPak® sterilization packaging eliminates the troublesome unknown by allowing for visual inspection of package contents prior to delivery.

To order this product, please refer to page 211.

Bowie-Dick Card

- The most important advancement in Bowie-Dick testing in 20 years

Like the Cardinal Health Bowie-Dick test pack, the new BD card serves as a consistent and reliable method to detect air leaks, inadequate steam penetration and vacuum pump failures in prevacuum steam sterilizers. The lead-free indicator ink and the elimination of the bulky test pack allow for efficient testing of proper machine function without adverse effects on the environment.

Cat. No.	Description	Qty.
T40309LF	Bowie-Dick card	30 per box, 4 box/case
T40312LF	Bowie-Dick card starter kit	31 per box, 1 holder

Bowie-Dick card starter kit

Bowie-Dick Test Pack

- Consistent and easy to use
- Lead-free ink
- Continual ink sunburst design allows for easy detection of sterilizer faults

T40307	Bowie-Dick test pack	30

Bowie-Dick test pack

Cleaning Effectiveness Indicators

- An appropriate challenge for cage and tunnel washers

Simulating dried blood, the indicator is clipped to the test basket and follows the cleaning process with soiled instruments. A clean indicator at the end of the wash cycle assumes the cleaning process is effective.

Cardinal Health cleaning effectiveness indicators are also available in a lumen format and for sonic systems to confirm effective cavitation.

Cat. No.	Description	Qty. Bx
T40370	Cleaning effectiveness indicator, standard	30
T40370B	Test basket	3
T40375	Cleaning effectiveness indicator, lumen	30
T40375L	Lumen wand	1
T40380	Sono-check	30

Performance by Design

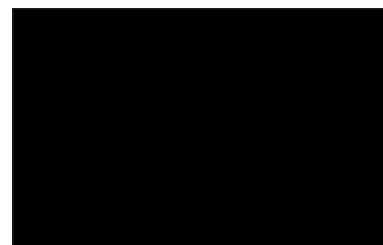

The purple-to-green integrating ink technology is the basis for many of Cardinal Health's sterilization monitoring products. This consistent, reliable technology allows labor- and cost-constrained sterile processing departments to improve their quality of outcomes by providing more information about the steam sterilization cycle.

B.I. Stat For Steam, EO

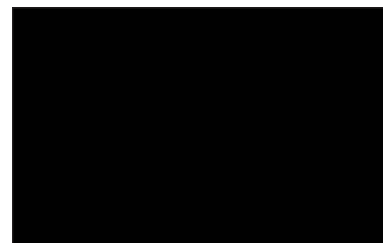

- Accurate and reliable predictor of biological outcomes
- Appropriate for monitoring implantable loads

B.I. Stat is comprised of a biological indicator and an instant readout card in a challenge test pack format. The instant readout card is cleared as a predictor of the biological spore outcome. B.I. Stat helps to maintain sterilization process control in conjunction with verification testing.

Cat. No.	Description	Qty./Bx
T40341P	B.I. Stat Steam	25 ea./25 controls

Light Handle Solutions

Flexible Cover

Rigid Handle

Rigid Handle

Flexible Cover

Light Handle Solutions

- Easy-to-use and disposable to help eliminate costly reprocessing
- Adapters are available for all popular lights

Two systems are available for convenience – a rigid light handle and a flexible light cover. The rigid handle threaded design fits most adapters in the market. The flexible cover is designed using our unique push system, allowing for easy application. The pull-tab facilitates fast removal.

Blade Disarming Instructions

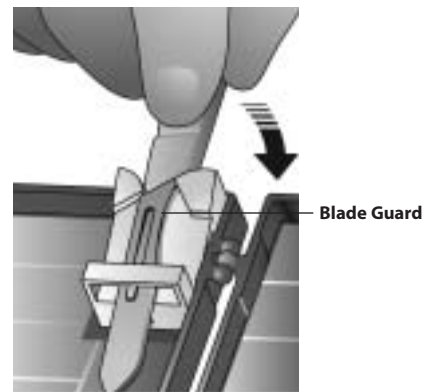

Step One

- Turn the scalpel so that the blade edge faces the needle counter box hinges.
- Push the blade handle forward above the **blade immobilizer** and below the **blade guard** rail.
- Apply slight forward and downward pressure on the scalpel handle to seat the blade base into the **blade immobilizer** shoulders.

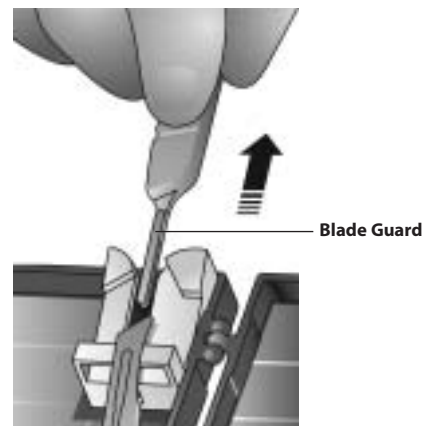

Step Two

- A slight click can be heard once the blade base seats into the **blade immobilizer** shoulders.
- The scalpel blade should now be immobilized.
- Apply a downward force on the scalpel handle to disengage the handle **key slot** from the base edge of the blade **cutout**.

Step Three

- Remove the scalpel handle from the blade by pulling back from the blade disarmer until the handle **key slot** is fully removed.
- The blade should tip forward onto the magnetic pad.
- The scalpel handle should now be used to direct the removed blade to its final position.

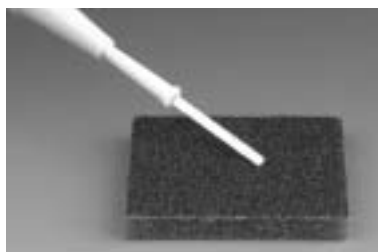

Surgical Accessories

Liner 1515

Cardinal Health

Medical Products and Services – Terms and Conditions of Sale

The following sets forth the terms and conditions of sale for Cardinal Health 200, Inc., the Medical Products and Services Group of Cardinal Health with principal offices located at 1450 Waukegan Road, McGaw Park, IL 60085 ("Cardinal Health"). By placing an order, Customer agrees to the terms and conditions below to the extent not inconsistent with any specific written agreement between Cardinal Health and Customer.

Prices

For up-to-the-minute price and availability, call your local Cardinal Health Customer Service Representative. Minimum order quantities and/or special handling fees may apply. Please confirm at time of order placement. Some products distributed by Cardinal Health may not be available for sale outside the U.S. and Puerto Rico.

Payment Terms

Payment terms are net 30 days. Any invoice that is paid past its due date will be assessed interest at a 1½% monthly (or 18% annual) rate or the highest amount allowed by law, if lower.

Returned Goods Policy

Return Procedure

All returns must be authorized by your Cardinal Health Sales or Customer Service Representative, who will advise you of the proper mode of transportation for the shipment. Authorization will be valid for only 30 days. Shortages and damages must be reported to Customer Service within 72 hours from receipt.

Each return must include the following information: (1) Purchaser name and address, (2) Cardinal Health invoice number, (3) Invoice date, (4) Purchaser purchase order number, (5) Quantity, catalog number and description of item and (6) Reason for return.

Return Policy

Cardinal Health will authorize the return of all products in salable condition with the following exceptions:

- Products not purchased from Cardinal Health. By offering product for return to Cardinal Health, Customer warrants and certifies that the products were purchased by the Customer from Cardinal Health.
- Products purchased more than 3 months prior to the return request.
- Products with expiration date less than 60 days.
- Products that are regulated hazardous chemicals or reagents.
- Instruments that have been used to analyze human body tissue.
- Sterile eaches of low unit of measure product.
- Special or custom products made to customer specifications.
- Products returned in defaced or other than original packaging.
- Drug products that are shipped outside the United States (reimport prohibited).
- Flu Vaccine.
- Any controlled substance product that is regulated by the DEA.
- Prescription drugs that (a) are returned without a customer-signed Cardinal Health Ongoing Assurance document and (b) do not achieve Cardinal Health protective service and protective packaging guidelines.
- Refrigerated, frozen or temperature-controlled products with the exception that Cool Room coded product ("C" coded) can be accepted back from customers and returned to stock only if ALL circumstances noted below apply to the return.
 1. The product is returned within a 5-day transit time window.
 2. The external outdoor air temperature is less than 86 degrees Fahrenheit (86°F).
 3. The only acceptable reasons for the return are a picking error or an ordering error.

All return items not locally stocked will be subject to locally determined restocking fee. All returns not due to Cardinal Health error will be subject to a minimum of 15% restocking fee. In the event that an unauthorized return is accepted, there will be a minimum of 25% restocking fee.

How to Initiate a Freight Claim

ALL Freight Claims are filed by the Albuquerque Freight Claims Department. Contact your Cardinal Health Customer Service Representative to report any damages or shortages.

Visible Damage or Shortage

1. Truck driver and receiver should jointly examine contents.
2. Both carrier's copy and consignee's copy of delivery receipt should be endorsed as to type of damage or shortage, along with notation of product codes.
3. Following carrier notification, product must be held for carrier inspection.
4. The carrier's representative will examine goods within 5 days and will fill out an "Inspection Report of Loss or Damage." Both carrier and receiver sign this report. Receiver should take exception to any statement by inspector with which they do not agree. The receiver retains copy of inspection.
5. Due to medical product licensing constraints, carriers are not allowed salvage. Obtain a Certificate of Destruction from carrier or Cardinal Health if inspection is waived.

Concealed Damage or Loss

1. Receiver must leave contents in original container and hold for carrier's inspection.
2. Report concealed damage or loss to delivering carrier immediately and request inspection. Inspection request must be within 48 hours of delivery. Notice may be given to the carrier by phone, email or in person and shall be confirmed by mail.
3. Contact Cardinal Health Customer Service within 48 hours to report a claim.

Reporting a Claim

1. Report damage or shortage to Customer Service within 48 hours of delivery.
2. All claims must be filed for a definite amount and have appropriate supporting documentation. Be prepared to provide the following information and photocopies to Customer Service at the time you report the damage.
 - a. Name of the carrier.
 - b. Original bill of lading number.
 - c. Original invoice number.
 - d. Photocopy of carrier's document pertaining to the particular shipment involved, wherein carrier has acknowledged loss and/or damage over carrier's signature (where loss or damage is noted at time of delivery). Ensure product codes and quantity are indicated.
 - e. Photocopy of inspection report (concealed loss or damage claims).

Procedure for Handling Damaged Merchandise and Freight Claims

1. Inspect all shipments the same day they are received.
2. Noticeable damage must be noted on the delivery receipt of the freight bill at the time of delivery or claim will be disallowed. Include product codes, quantities and damage descriptions as part of the notation.
3. Notify the Cardinal Health Customer Service Representative within 48 hours of the customer receipt so a claim may be properly filed by the Freight Claims Department with the carrier.
4. Damage must be followed with a request for inspection from the delivering carrier in order to substantiate proper amount of damage. The request for this inspection must be made within 48 hours of delivery. An inspection report is mandatory when filing a claim.
5. Retain the merchandise at your facility until inspection has been completed by the carrier or its representative.
6. The carrier's representative will examine goods within 5 days and will fill out an "Inspection Report of Loss or Damage" or an "Inspection Report of Loss or Damage Discovery After Delivery." Both carrier and receiver sign this report. Receiver should take exception to any statement by inspector with which they do not agree. The receiver retains copy of inspection.
7. Due to medical product licensing constraints, carriers are not entitled to salvage of damaged product. Obtain a Certificate of Destruction from carrier. In the event that inspection has been waived, an internal Certificate of Destruction is acceptable with approval from Cardinal Health.

Product Delivery

Shipments are FOB Destination. Cardinal Health shall use its reasonable efforts to fill orders, but Cardinal Health shall not be liable for nonperformance or delays caused by a shortage of raw materials, manufacturing problems, delivery or labor problems, acts of regulatory agencies, discontinuation of a product line, Acts of God or causes beyond its control. Customer agrees that, in such events, Cardinal Health may allocate products among all purchasers, without liability.

Warranty

CARDINAL HEALTH WARRANTS THAT ANY PRODUCT IT MANUFACTURES IS, AS OF THE DATE OF SHIPMENT, FIT FOR THE PURPOSES AND INDICATIONS DESCRIBED IN THE LABELING. UNLESS THE PRODUCT IS USED IN ACCORDANCE WITH ITS INSTRUCTIONS, THESE WARRANTIES ARE VOID AND OF NO EFFECT. OTHER PRODUCTS DISTRIBUTED BY CARDINAL HEALTH CARRY ONLY THOSE WARRANTIES MADE FOR THEM BY THEIR MANUFACTURER. THERE ARE NO OTHER EXPRESSED OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. CARDINAL HEALTH'S SOLE OBLIGATION AND CUSTOMER'S EXCLUSIVE REMEDY FOR BREACH OF ANY WARRANTY SHALL BE, AT CARDINAL HEALTH'S OPTION, TO REPAIR OR REPLACE THE PRODUCT. CARDINAL HEALTH SHALL NOT BE LIABLE FOR PROXIMATE, INCIDENTAL OR CONSEQUENTIAL DAMAGES. MORE SPECIFIC WARRANTIES MAY ACCOMPANY INDIVIDUAL PRODUCTS.

Publicity

Customer will not make any press release or other public announcement regarding its purchases of products from Cardinal Health without Cardinal Health's express prior written consent.

Compliance with Law

By placing an order, Customer represents and warrants that it has all required local, state and federal licenses, permits and approvals required to purchase, use and/or store the products it elects to purchase from Cardinal Health. If Customer receives from Cardinal Health any "discounts or other reductions in price" under Section 1128 b)(3)(a) of the Social Security Act (42 U.S.C.1320-7b(b)(3)(a)), Customer shall disclose the discounts or reductions in price under any state or federal program which provides cost- or charge- based reimbursement to such customer for the products or services it purchases from Cardinal Health.

Governing Law

The agreement resulting from these Terms and Conditions of Sale shall be governed by the laws of the State of Illinois, applicable to contracts made and to be performed in that state.

Effective Date: May 1, 2004. All terms and conditions contained herein are subject to change without notice.
