Cardinal Health™
Jackson-Pratt®
Wound Drains

Providing products to help improve patient safety and comfort is at the heart of what we do. For years, our quality, clinically designed Jackson-Pratt® Wound Drains have been supported with best practice guidance to help ensure that clinicians, too, feel comfortable and ultimately more confident in what they do.

Our Jackson-Pratt® Wound Drain line, trusted amongst the clinical community since 1971 and a pillar of our extensive drainage offerings, represents our long-standing experience in the industry. You will find comfort in knowing that we provide a full assortment of wound drains and drainage systems, with an opportunity to standardize, ensuring that your wound drain portfolio will effectively meet the needs of a variety of situations and procedures.

The Cardinal Health Wound Drain team is committed to helping provide solutions for more positive patient outcomes.

### Jackson-Pratt® Perforated Drains

Cardinal Health™ Jackson-Pratt®
Perforated Drains are available in a
variety of sizes and styles, both with
and without trocars. They are often
referred to as Jackson-Pratt®,
JP Drains or Classic Drains.

Cardinal Health™ Jackson-Pratt®
Perforated Wound Drains were the
original flat perforated wound drain
in the market.

### Cardinal Health™ Jackson-Pratt® Perforated Drains

- · Injection molded for strength and drain integrity
- Flat drains are a two-piece design
- Flat drain has inner lumen ribbing to help prevent drain collapse and clogging and help preserve drain patency
- Flat drains are silicone that is barium impregnated for X-ray detection of drain
- Round drains are available in both silicone and PVC and feature a radiopaque stripe running the entire length of the drain for X-ray detection
- Perforated round drains are a one-piece design and are hubless
- Silicone T-tube drains are used for hysterectomy and cholecystectomy and is soft and pliable
- Not made with natural rubber latex

### Jackson-Pratt® Hemaduct® Wound Drains

Jackson-Pratt® Hemaduct®
Wound Drains allow multiple
fluid pathways should soft
tissue obstructions restrict
continuous fluid flow
throughout the drain.

#### Cardinal Health™ Jackson-Pratt® Hemaduct® Drains

- Internal portal Internal portals interconnect open and closed channels to allow fluid to change channels and circumvent obstructions
- **Open channels** Open channels span the length of the drain to maximize fluid collection potential
- **Closed channels** Closed channels minimize the risk of tissue ingrowth while providing an alternative pathway for fluid
- **Silicone advantage** Silicone material provides strength and softness
- **Cardiothoracic** For procedures such as on-pump or offpump coronary artery bypass graft, valve replacement or repair, thoracotomy and lobectomy
