SDS / MSDS Sheets:

Sheathing Technologies does not sell any products covered by the Federal OSHA SDS/MSDS Hazard Communication Standard (29 CFR 1910.1200), and therefore does not provide SDS/MSDS sheets.

We would like our customers to know that Sheathing Technologies products are, per the OSHA standard, composed only of **non-hazardous** substances, with the sole exception of some probe covers made of Natural Rubber Latex, which may cause allergies in some individuals. (As these Natural Rubber Latex probe covers are manufactured "articles" and are labeled with an allergy warning, per FDA requirements, SDS/MSDS sheets are not required).

Although Sheathing Technologies has offered MSDS Sheets in the past, upon reviewing the Federal OSHA regulations, we have determined that this is not required, and will no longer be offering SDS/MSDS sheets in the future.
