

Vital Signs[®]

labor and delivery care consumables

Provide excellent care throughout the birthing process

Vital Signs accessories and supplies for GE Corometrics™ monitors offer innovation and quality that help clinicians provide exceptional care to expectant mothers and their babies, from preterm monitoring to delivery to discharge. Our antepartum and intrapartum fetal monitoring products provide essential information that helps facilitate quick and effective decision making. Providing quick access to reliable data, our products support the high standard of obstetrics care you and your patients expect.

External monitoring: toco and ultrasound transducers and belts

Each monitor within the GE Corometrics portfolio has been specifically designed and tested to perform best when used with validated transducers. Our toco and ultrasound transducers come in a variety of options. All transducers come with a two-year warranty.

Additionally, our belts are designed to ensure a secure connection of the transducer around expectant mothers, reducing the need to frequently readjust.

	Cat. no.	Description	Qty. (cs.)
	Transducer, ultrasound, reusable		
	5700HAX	Button style, 8'	1
	5700LAX	Loop style, 8'	1
	Transducer, toco, reusable		
	2264HAX	Button style, 8'	1
	2264LAX	Loop style, 8'	1

	Cat. no.	Description	Qty. (cs.)
	Belts for use with transducer, disposable		
	4425FAO	Loop style with Velcro®, pink/blue	50
	4425AAO	Loop style, mesh material, white	10
	4425CAO	Loop style with Velcro, white	10
	8024AAO	Loop style, foam with Velcro ends	150
	2015919-001	Button style, blue/pink-stripped	100
	2015827-001	Button style, blue	10

Internal monitoring: fetal spiral electrodes (FSE) and intrauterine pressure catheter cable (IUPC)

Vital Signs fetal spiral electrodes and intrauterine pressure cables are designed and tested for use with GE Corometrics monitors. When internal monitoring is required, fetal spiral electrodes help monitor the fetal heart rate (FHR) through electric transducers that connect directly to the fetal scalp. FHR monitoring provides the crucial basis for evaluating fetus wellness.

Our fetal spiral electrodes design includes:

- Wiring clasp at top of electrode, which allows for steady, one-handed placement and release
- Two-and-a-half-year shelf life
- Sterile, single-use and not made with natural rubber latex

Our IUPC cable helps provide accurate readings of uterine activity.

These unique features help enhance patient care:

- Water-resistant connector helps mitigate the risk of erroneous readings.
- Exclusive cable check helps ensure a stable connection.

Maternal ECG cables and leadwires

Maternal ECG cables and leadwires are available for use with GE Corometrics monitors. Cables come in round or rectangular connection options, and leadwire sets provide three-lead monitoring.

	Cat. no.	Description	Qty. (cs.)
	FSE and accessories		
	7000AAO	Fetal spiral electrodes	50
	2464AAO	Attachment pads for FSE cable	50
	1590AAO	Cable, FSE, round connector to the monitor, 8'	1
	1591AAO	Cable, FSE, rectangle connector to the monitor, 8'	1
	IUPC cable		
	1336DAO	Cable, connects IUPC to the monitor, 10'	1
	Cat. no.	Description	Qty. (cs.)
	Y adapter cable for maternal/fetal ECG		
	1442AAO	Rectangular connector, 1'	1
	Multi-Link™ ECG Cable and Leadwire Kit, 3-Lead, AHA		
	1554AAO	ECG cable with round connector, 8' Leadwire, 3-lead, Grabbers, 29"	1
	1553AAO	ECG cable with rectangular connector, 8' Leadwire, 3-lead, Grabbers, 29"	1

Fetal chart paper

Vital Signs paper products are designed and tested for use with GE Corometrics monitors. With a long history of quality and longevity, our maternal/fetal monitoring paper will provide an accurate record of the delivery that will maintain its integrity for years to come.

Other accessories

Our fetal/maternal monitoring accessories have been specifically designed and tested to perform with GE Corometrics monitors. Our products will provide the highest level of quality, performance and safety when used together as a system with Corometrics monitors. Use the remote event marker accessory for simple and reliable annotation.

	Cat. no.	Description	Qty. (cs.)
	3919BAO	Remote event marker for use with GE Corometrics monitors	1

	Cat. no.	Description	Qty. (cs.)
Fetal chart paper			
	2009828-CAO	30–240 beats per minute (BPM), Z-fold designed for use with Coro 12X, 170 and 250	40
	2009828-DAO	50–210 BPM, Z-fold designed for use with Coro 12X, 170 and 250.	40
	2009828-FAO	50–210 BPM, Z-fold, minute marks designed for use with Coro 12X, 170 and 250	40
	2009828-AAO	30–240 BPM roll designed for use with Coro 14X	6
	2009828-28B	Non-stress test (NST) patient recording forms for fetal charts	150
	2009828-28A	Antepartum nuchal translucency (NT) patient recording forms for fetal charts	300
Labels			
	2009828-491	Chart guard labels for records	200
